

MODULE BOOKLET

Each module booklet contains the following sections:

- General description
- Connector pin population
- Boolean trigraphs
- Engineering notes
- Module maps
- Boolean reconstruction
- Jumper definitions
- Connector definitions
- Composite artwork listing
- Path lengths
- Parts information
- Module contacts

GENERAL DESCRIPTION

The general description section is an overview of what the module contains and how it functions.

CONNECTOR PIN POPULATION

This section lists all the connections between modules. It tells where the data is coming from or going to, and the number of pins used on the module.

BOOLEAN TRIGRAPHS

The Boolean trigraphs section contains English definitions of the Boolean terms.

ENGINEERING NOTES

Each design engineer was responsible to describe portions of the Boolean. These notes relate to how the module works and what Boolean terms perform the functions.
