11) Go EB Data (IB   TB)   —   There will be VL pulses that occur on an
                                  external write reference. They indicate
                                  that a valid word was sent from the EB.

12) Phase O Bit 23 (TB   TC) —   This is data bit 23 of the 3 data packets
                                   for Phase O. They indicate data bit 23,
                                   47 or CB7 for this phase.
